

Mobile **Panic Safety** Device

MOBILE PERSONAL SAFETY AND PROTECTION

Umbrella™ Mobile 5G enabled mobile safety device enables personal protection anywhere for a variety of use cases.

The device provides immediate incident notification and protection including fall detection - ideal for multiple enterprise industries including VIPs, transportation workers, construction or other lone workers, and students and teachers on or off campus.

Safety solution for your most important resource

Connected 24/7 to monitoring centers

Seamless real-time tracking and response

With a **button press**, **Umbrella notifies authorities** of an incident sending location and using 2-way voice to connect with **campus police, friends, and family** to dispatch emergency responders for immediate assistance.

SEAMLESS PERSONAL SAFETY AND PEACE-OF-MIND

- The Umbrella 5G Mobile Personal Safety Device provides immediate incident notification.
- No installation- Preconfigured requires no on-site configuration
